

KAZENA Books

AI-Powered Accounting, Built for Southeast Asia

Thailand · Philippines · Indonesia · Japan

Snap a receipt. The AI keeps your books, knows your local tax, and speaks your language.

Available on App Store & Google Play

by Inspo Nexus Global OPC · Metro Manila, Philippines

THE PROBLEM

Bookkeeping in Southeast Asia is harder than it should be

Hours lost to manual entry

Typing every receipt, bank line and journal by hand. Slow, repetitive, and easy to get wrong.

Local tax is complex

VAT/GST, withholding tax and payroll deductions all differ by country — and the rules keep changing.

Language barriers

Most accounting software is English- or Japanese-only. Staff lose time guessing what each field means.

Too many disconnected tools

Receipts in one app, invoices in another, payroll in a spreadsheet. Nothing reconciles automatically.

MEET KAZENA BOOKS

One app for the entire accounting cycle — from receipt to financial statement.

1

AI does the data entry

OCR reads receipts & bank files; AI builds the journal entries.

2

Local tax, built in

TH · PH · ID · JP VAT, withholding & payroll —
calculated for you.

3

Your language

English · ไทย · Bahasa Indonesia · 日本語, auto-
selected.

Whoever keeps the books — KAZENA Books works for you

Corporations

Full double-entry books, P/L & balance sheet, and compliance-ready exports for your filings.

SMEs

Automate the boring parts. Stay on top of cash and tax even without an in-house accountant.

Sole proprietors

Simple, affordable, mobile bookkeeping that just works — straight from your phone.

Tax & accounting firms

Standardize every client, cut data-entry time, and export statements ready to file.

WHY YOU'LL LOVE IT

Six reasons KAZENA Books changes how you work

AI does the typing

Receipts & bank statements become journal entries automatically.

Local tax, done right

TH, PH, ID & JP tax built in and verified against current law.

Your language

English, Thai, Bahasa Indonesia & Japanese — auto-selected.

Complete cycle

Expenses, sales, payroll, invoicing & banking in one place.

Reports in one click

Trial balance, P/L, B/S, VAT & ledger — instantly, export-ready.

Anywhere, secure

Cloud + mobile-first, with secure sign-in on any device.

FEATURE SPOTLIGHT

AI that does your bookkeeping for you

From paper to posted in seconds

1

Snap or upload

Photograph a receipt or upload a PDF / image.

2

AI reads it

OCR extracts date, amount, tax & vendor instantly.

3

Journal is ready

AI posts a balanced double-entry — you just approve.

More AI superpowers

> Bank statement → auto-journal

Import a CSV and AI classifies every transaction to the right account.

> Auto-fill business & clients

Read registration papers or a business card; AI fills the form.

> AI-drafted invoices & quotes

Describe the job in plain text; AI builds the document.

> You stay in control

Every AI suggestion is reviewed and approved by a human.

NEW — AND GETTING SMARTER EVERY DAY

An AI that learns, guards — and answers you

It learns how you book

ALL PLANS

- Remembers which account you use for each vendor and pre-fills it — your corrections become its habits
- One-tap approve for clean, high-confidence entries, right from the list
- Learns each shop's VAT treatment, so "VAT unknown" questions fade away

It guards your books

ALL PLANS

- Flags possible duplicates — same vendor, amount and date, booked twice
- Warns when a bank line matches a receipt you already booked (no double counting)
- Alerts on unusual amounts — catches an extra-zero typo before it hits your P/L

It answers your questions

STANDARD & PRO

- "Ask your books": plain-language questions, instant answers
- Totals, top vendors, unpaid invoices — straight from your real data
- Read-only and safe: the AI can look, never touch, and never invents a number

Coming soon — WhatsApp receipts: send a photo of a receipt to KAZENA on WhatsApp and the AI books it for you.

THE KILLER FEATURE

Local tax for 4 countries — built in, not bolted on

Thailand

VAT 7%

Philippines

VAT 12%

Indonesia

PPN 11%

Japan

CT 10%

VAT / GST automatic

- Inclusive or exclusive calculation
- Output vs input VAT tracked
- Net VAT payable summary

Withholding tax

- Philippines — EWT
- Indonesia — PPh 23
- Thailand — WHT
- Auto-computed on payments

Payroll deductions

- PH: SSS · PhilHealth · Pag-IBIG · BIR
- ID: BPJS · JHT · JP · PPh 21
- TH: Social Security (SSO) · PIT
- Net pay calculated for you

✓ **Verified against current law** Rates cross-checked with PwC Worldwide Tax Summaries and national authorities (2025/26).

English

English

Global business standard

ไทย

Thai

For your Thai team

Bahasa

Bahasa Indonesia

For your Indonesian team

日本語

Japanese

For Japanese owners & HQ

Auto-detected at login

Opens in the right language based on your location — Thai in Thailand, Bahasa in Indonesia, English elsewhere.

Localized end to end

Menus, account names, financial reports and the in-app help guide are all translated — not just the buttons.

Switch anytime

Each user picks their own language in Settings; the whole app updates instantly.

The complete accounting cycle — eight modules, one app

Expenses

Receipt upload, manual entry, withholding tax, payables.

Sales & invoices

Capture by OCR/AI, track receivables, reconcile payments.

Payables (AP)

Record supplier bills and match payments to settle them.

Expense claims

Staff submit, managers approve — then it posts to the books.

Payroll & insurance

Salary, bonus & statutory deductions auto-calculated.

Invoices & quotes

Create, brand with logo/seal, convert quote → invoice, print PDF.

Bank import

Upload a CSV; AI turns transactions into journal entries.

Master data

Business profile and a reusable client/customer directory.

Books-ready, audit-ready — and ready to submit

Financial statements, generated for you

Trial balance

Every account, with an automatic debit = credit check.

General ledger

Click any account to drill down into its transactions.

Profit & Loss / Balance Sheet

Generated live from your entries — always balanced.

VAT summary

Output vs input VAT and the net amount payable.

Authority reports — right up to submission

▶ The exact reports authorities require

Not just raw numbers — KAZENA Books builds the compliance filings your regulator asks for, straight from your books.

▶ Indonesia & Philippines coverage

ID: CORETAX, LKPM & WLKP reports. PH: BIR & SEC-ready statements (AFS/GIS). Rolling out now — more forms coming soon.

▶ Right up to submission

You reach a finished, filing-ready document — your accountant just reviews, signs and files. No re-keying into portals.

▶ Export, print & PDF

One-click CSV (UTF-8) and clean printable reports — Bahasa, Japanese & Thai never break. Always reconciled.

Cut data-entry time

AI handles receipts and bank statements, so your team reviews instead of retypes — take on more clients with the same staff.

Standardize everything

The same double-entry structure across every client and every country. No more reverse-engineering messy spreadsheets.

Multi-country expertise built in

TH, PH and ID tax logic is already inside the app — less manual checking, fewer mistakes.

Export ready to file

CSV and PDF outputs slot straight into your filing workflow and government portals.

ANYWHERE · ANY DEVICE · SECURE

Your books, in your pocket

Cloud-based

Nothing to install or back up. Your data is safe in the cloud and synced in real time.

Mobile-first

Designed for the phone first. Capture a receipt or check a report on the go.

Secure sign-in

Email/password and Google login, password reset, and strong-password tools.

Protected data

Built on bank-grade cloud infrastructure with per-user data isolation.

Try it now in any browser: kazena-books.vercel.app

	Spreadsheets & manual entry	Generic foreign software	KAZENA Books
Data entry	Manual, slow	Mostly manual	AI-automated
TH / PH / ID tax	Do it yourself	Rarely supported	Built in & verified
Local languages	—	English only	EN · TH · ID · JP
All-in-one cycle	Scattered files	Often modular / costly	One app, end-to-end
Mobile use	Hard	Limited	Mobile-first
Cost to start	Hidden time cost	Expensive licenses	Affordable, App/Play

Same books. A fraction of the time. Built for where you do business.

Our mission

To give every business and accountant in Southeast Asia the power to keep perfect books — effortlessly, in their own language, and within their own tax system.

- ◆ **Local-first** — We build for Thai, Filipino and Indonesian realities — not as an afterthought.
- ◆ **AI with accountability** — Automation that saves time, with a human approving every entry.
- ◆ **Honest & compliant** — Tax logic verified against current law and trusted sources.
